DETAILED ACTION

Allowable Subject Matter

1. The following is a statement of reasons for the indication of allowable subject matter:

Claims 1-10 are allowed because the prior art fail to teach or suggest the claimed invention.

Regarding Iwashiro (US Patent No. 6,285,705), Iwashiro discloses in Fig. 1 a pumped solid-state laser having an asymmetrical optical resonator provided with two resonator mirrors 31 and 32, and a thermal lens (created by the heat and gain medium 1). Iwashiro further discloses the relation of the radii of the mirror and resonator length to the thermal lens (col. 6, lines 47-67 to col. 7, lines 27). However, Iwashiro fails to teach the recited criteria with respect to radii of the mirrors and the resonator length.

2. Regarding Caprara (US Patent No. 6,115,402), Caprara discloses in Fig. 19 a pumped solid-state laser having an asymmetrical optical resonator provided with two resonator mirrors 224 and 230, a thermal lens (created by the heat and medium 222), and two principal planes 206 and 218. Caprara further discusses about the relation between the thermal lens to the curvature of the resonator mirrors and the resonator length. Caprara, however, does not disclose the stability criteria $0 < G_1 G_2 < 1$ and the refractive power equations.
